Rafael Felipe Silva

Data & Automation Professional | Power BI · Power Platform · Python · SQL

Betim, MG, Brazil | dev.rafaelfelipe@gmail.com | linkedin.com/in/rafaelfelipeps | devrafaelfelipe.github.io
Nationality: Brazilian | Open to relocation (requires visa sponsorship) | Available for remote work (UTC-3)

PROFILE

Data and automation professional with 2+ years of experience in business intelligence, process automation and software development, currently at DHL Supply Chain. I build Power BI dashboards, Power Apps and Python/Power Automate workflows that replace manual work in logistics operations. Delivered three Kaizen-awarded projects, including a 90% reduction in report generation time, and earned recognition from Stellantis. Looking to bring this experience to a supply chain, logistics or data team in Europe.

WORK EXPERIENCE

Continuous Improvement Assistant | DHL Supply Chain

Betim, Brazil | 07/2026 – Present

Data, automation and AI adoption for the New Programs team and other areas at DHL's operation inside the Stellantis plant.

- Built Power BI dashboards for Sourcing and ODM/ECR monitoring; cut report generation time by 90% (Kaizen award)
- Developed an IT asset validation system (Kaizen award)
- Delivered a Power Apps and Power BI solution on SharePoint Lists, giving project managers real-time data updates
- Automated recurring processes with Python and Power Automate, including a transport cost RPA (Kaizen award)
- Built a rack-per-vehicle capacity planning tool, replacing manual spreadsheets
- Write the weekly digitalisation newsletter and designed an internal AI training programme

Performance and Data Analysis Intern | Banco Mercantil

Belo Horizonte, Brazil | 04/2026 – 06/2026

- Supported BI ETL processes to build OLAP cubes and data marts for business decision-making
- Built Power BI dashboards and SQL queries for customer base and performance analysis
- Supported forecast analyses, budget tracking and financial feasibility assessments

IT Assistant | ZAMine Service Brasil

Betim, Brazil | 07/2025 – 03/2026

- Built Power BI dashboards and ETL/data integration pipelines feeding BI systems
- Monitored network infrastructure with Grafana
- Managed users, groups and security policies in Active Directory and Microsoft 365
- Provided L1/L2 support for hardware, software and network issues

Back-end Development Apprentice | Hotmart

Belo Horizonte, Brazil | 04/2023 – 04/2024

- Built the "Event Tickets" section of Hotmart Developers, the company's public API documentation, using Gatsby (React)
- Updated API endpoint documentation to streamline partner integrations
- Worked in agile cycles with Jira, Git/GitHub and CI pipelines (Drone)
